Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Receipt is acknowledged of the amendment filed on July 1, 2011, which has been fully considered in this action.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 5, 6, 8, 11, 13, 14 and 18-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Pinciario.

Pinciario discloses a bath comprising all the featured elements of the instant invention, note specifically neck water outlet fitting 22a with pillow 14 and shoulders water outlet fitting 22e with pillow 14c/34; body nozzles 22c/22d.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3752

5. Claims 4, 10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pinciario.

Pinciario discloses a bath comprising all the featured elements, except the water connections being provided in different upper wall or rim sections; and the flow of water being wider than it is deep. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the water connections in different upper wall sections of the hot tub of Pinciario since such a modification is merely the duplication of parts and it is known to provide multiple seating areas in a hot tub and it would be advantageous to provide such outlet fittings/pillow arrangements for all the users. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the flow of water being wider than it is deep, since with such a modification a larger surface area can be covered over a person's neck or shoulders.

Allowable Subject Matter

6. Claims 3, 7, 9 and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed July 1, 2011 have been fully considered but they are not persuasive. Applicant argues that the Pinciario reference fails to disclose or teach a neck water outlet fitting "interchangeably connectable" to the water connection and a shoulders water outlet

Art Unit: 3752

fitting "interchangeably connectable" to the water connection, note that such a recitation only requires the water outlet fittings to be "capable of" being interchangeably connected to the water connection. In the instant case of Pinciario it discloses and shows the neck water outlet fitting 22a and the shoulders water outlet fitting 22e is capable of being interchangeably connectable, since the nozzles are press fit into the water connection and would be capable of being removed to be interchangeably connectable to the other water connections.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
